

Top Performing RFID Tags for All Your Supply Chain Needs

New Product Offering

Metal Mount Rigid Tags	Key Product Attributes
1. Terminator	One of the top performing on-metal tags on-metal available today – up to 50 foot read distance; leap frogs current tags reads and provides best performance-per-price value in the industry; specifically developed for large distribution and warehousing applications, features popular thin-as-a-coin profile size at 2.0"x 4.5"x 0.125" with an exclusive RFID inlay designed by KU and 512 bits of memory with the Higgs 3 IC
2. Portunus II	Newly redesigned to deliver 30% better read performance reaching at up to 30 feet, same thin-as-a-coin size: 4.0"x 2.0"x 0.072"; exclusive KU inlay and 5 times more memory – 512 bits thanks to the Higgs 3 IC
3. Global	The world's first on-metal tag that provides up to 30 feet read distance anywhere (860 to 960 Frequency). Same thin-as-a-coin size at 4.5" x 2.0"x 0.125", plus an exclusive KU inlay and the Higgs 3 IC with 5 times more memory – 512 bits versus 96 bits
Special	Key Product Attributes
1. Stealth	Thin-as-a-dime, light as a credit-card and readable on-metal from 30 feet away; created specifically for discretely tracking high value IT equipment and security applications. Tag size one-half the thickness of current tags – total dimensions 3.3"x 2.1"x 0.030"; another proprietary inlay from KU with 5 times more memory (512 bits versus 96 bits) due to the Higgs 3 IC
